ABSTRACT

This report provides basic statistical data for Idaho State University, and includes both point-of-time data as well as trend data. The information is divided into sections emphasizing students, programs, faculty and staff, finances, and physical facilities. Student data includes enrollment, geographical distribution, student/faculty ratios, credit hours, demographic data (fall 1998 semester; 5-year comparison), and age distribution. Similar information is also provided on students for the spring 1999 semester. The section on degrees and certificates includes academic degrees offered and awarded and applied technology certificates and degrees offered and awarded. Faculty and staff statistics include total Idaho State University employees, employee full-time-equivalent history, number of full-time faculty, faculty salaries, faculty salary comparisons, exempt nonfaculty salaries, and administrative salary comparisons. Financial data includes student fees, student financial aid awarded, state appropriate analysis, operating budgets, revenues, and expenditures. Physical facilities data includes physical plant assets, replacement values, square footage, housing occupancy report, library collection, and class data. (JM)

STATISTICAL PORTRAIT
1998-1999

INTRODUCTION

This is the 23rd in a series of statistical portraits developed by the Office of Institutional Research. It has been designed to provide the faculty, administration, and other interested persons with a basic statistical portrait of the university. Some of the information provides a snapshot of the university at a particular point in time, while other data portrays trends over a period of time.

The information is divided into sections which emphasize students, programs, faculty and staff, finances, and physical facilities.

Several assumptions have gone into the preparation of this resource book. First and most importantly, there is a basic assumption that information about the status of the university is one of the most significant tools in effective educational decision making. Second, there is the assumption that the availability of information about the university in a centralized and relatively easy to use format will help improve the level of knowledge about the institution and will help assure that consistent information is provided to any general inquiries. Finally, the series of fact books can be utilized to provide trend data over many years for a wide variety of institutional characteristics. However, because we are constantly working to improve the usefulness of this document, changes have been and will continue to be made in the content and format, so all data may not be available over the entire series.

In this line, we do welcome suggestions from readers of the document about how we might make it more useful or more understandable. If there is information which does not appear in this portrait or if something could be presented in a more useful form, please contact the Office of Institutional Research. Our primary purpose is to be of assistance in making information accessible to its users. Any comments or suggestions that will enable us to do our job better will be given every consideration.

* NOTES: Because the ACT scores shown are for first-time freshmen, they are not necessarily representative of the scores for students who ultimately are admitted and graduate from a particular program.

ACT scores beginning Fall Semester, 1990 are not comparable to scores for previous years because the American College Testing Program implemented their expanded test in 1990.

* NOTES: Because the ACT scores shown are for first-time freshmen, they are not necessarily representative of the scores for students who ultimately are admitted and graduate from a particular program.

ACT scores beginning Fall Semester, 1990 are not comparable to scores for previous years because the American College Testing Program implemented their expanded test in 1990.

ACADEMIC PROGRAMS THAT MIGHT BE ACCREDITED:

Clinical Psychology: Accreditation from the American Psychological Association cannot be sought until the first group of doctoral students have graduated.

Public Administration: The resources (faculty, space, etc.) required to meet the guidelines of the American Society for Public Administration would be considerable and unwarranted since graduates have not encountered employment problems.

Public Health: Will apply for accreditation after the requisite number of graduates finish the program.

Radiological Technology: Gave up programmatic accreditation since graduates are no longer required to graduate from a Joint Review Committee on Education in Radiologic Technology accredited program in order to be certified by the American Registry of Radiologic Technologists (ARRT).

* Accreditation is required for licensure.
** When FAA changes regulations, the Aircraft Maintenance Mechanics program is reviewed. FAA officials visit the program semi-annually.

APPLIED TECHNOLOGY PROGRAMS THAT MIGHT BE ACCREDITED:
Civil Engineering Technology: Might be accredited with increased funding.
Electronic Systems Technology: Might be accredited with increased funding.

151

Discussions have been initiated with the College of Engineering concerning which programs in the School of Applied Technology that might receive accreditation from the Accreditation Board for Engineering and Technology.
